

PRODUCT UPDATE DLC 5.1

ORA-LED FIXTURE SERIES

We are transitioning our ORA-LED multi use flood /wall light fixture to **DLC 5.1**.

The new version has an improved lumen output, resulting in a higher efficacy of ~ 120 lumens per watt. These fixtures are also dimmable with 0-10V dimming driver.

There is a design change in the 15W unit. **The ORA1-LED15 is now bigger and is the same size as the ORA2-LED30.**

Key Features That Have Not Changed:

- Sleek & elegant design
- Wall light / flood light with wide beam optics.
- Adjustable head to direct light where needed.
- Interchangeable mounting where the knuckle mount fixture can be converted to a wall mount by adding a back box.

New ORA fixtures are in stock. We do have limited inventory of the previous versions left over that we will put on clearance.

From a DLC perspective, please note that the previous ORA SKUs will remain on the DLC QPL until **June 30th 2022**.
